SINGLE-SIDED & DOUBLE-SIDED
HOW TO MEASURE FOR A REPLACEMENT GRAPHIC

Step 1: Measure the width of the existing frame, from outside edge of frame to other outside edge of frame. Do not measure from inside the silicone groove.

Step 2: Measure height of existing frame from outside edge of frame to other outside edge of frame. Do not measure from inside the silicone groove.

Step 3: Set up new graphic based on Width x Height measurement, adding .75” bleed on all sides.
